BERGMAN TOOL MFG. CO.
BUFFALO, N.Y.

Bergman Tools are Specialized Products

EVERY Jobber, Dealer and many of his customers now realize the advantages of standardization and specialization in modern manufacturing. The manufacturer who makes a few articles, can make them better and at lower cost than the one who makes many and must be constantly changing his tools to meet his varied requirements.

Bergman Tools are distinctly specialized products, held rigidly to strict standards. They are designed with the user's viewpoint in mind and built to give satisfactory service. A Bergman Tool is made of the metal best fitted to endure the strains which that particular tool must undergo. When heat treatment is required it is given carefully, exactly, controlled by the most modern methods. The jobber or dealer who sells Bergman Tools is fully protected by the quality of the product.

The Bergman Tool Mfg. Company

1573-75 Niagara Street

BUFFALO, N. Y.

The Bergman Guarantee

"A new tool for any defective one" is a symbol of our own belief in the superiority of Bergman Tools. It is made possible by the care and skill which is a part of our manufacturing processes. Samples of Bergman Tools are always available and will be furnished upon request to Jobbers who care to make comparisons with any competitive products.

List Price—Pin or Stud, No. 4	.05	.05	.05	.05	.10

The Curve that Fits the Hand is the first real improvement in wrench design in years. It gives firm grasp. The hand can't slip, giving greater leverage and pulling power.

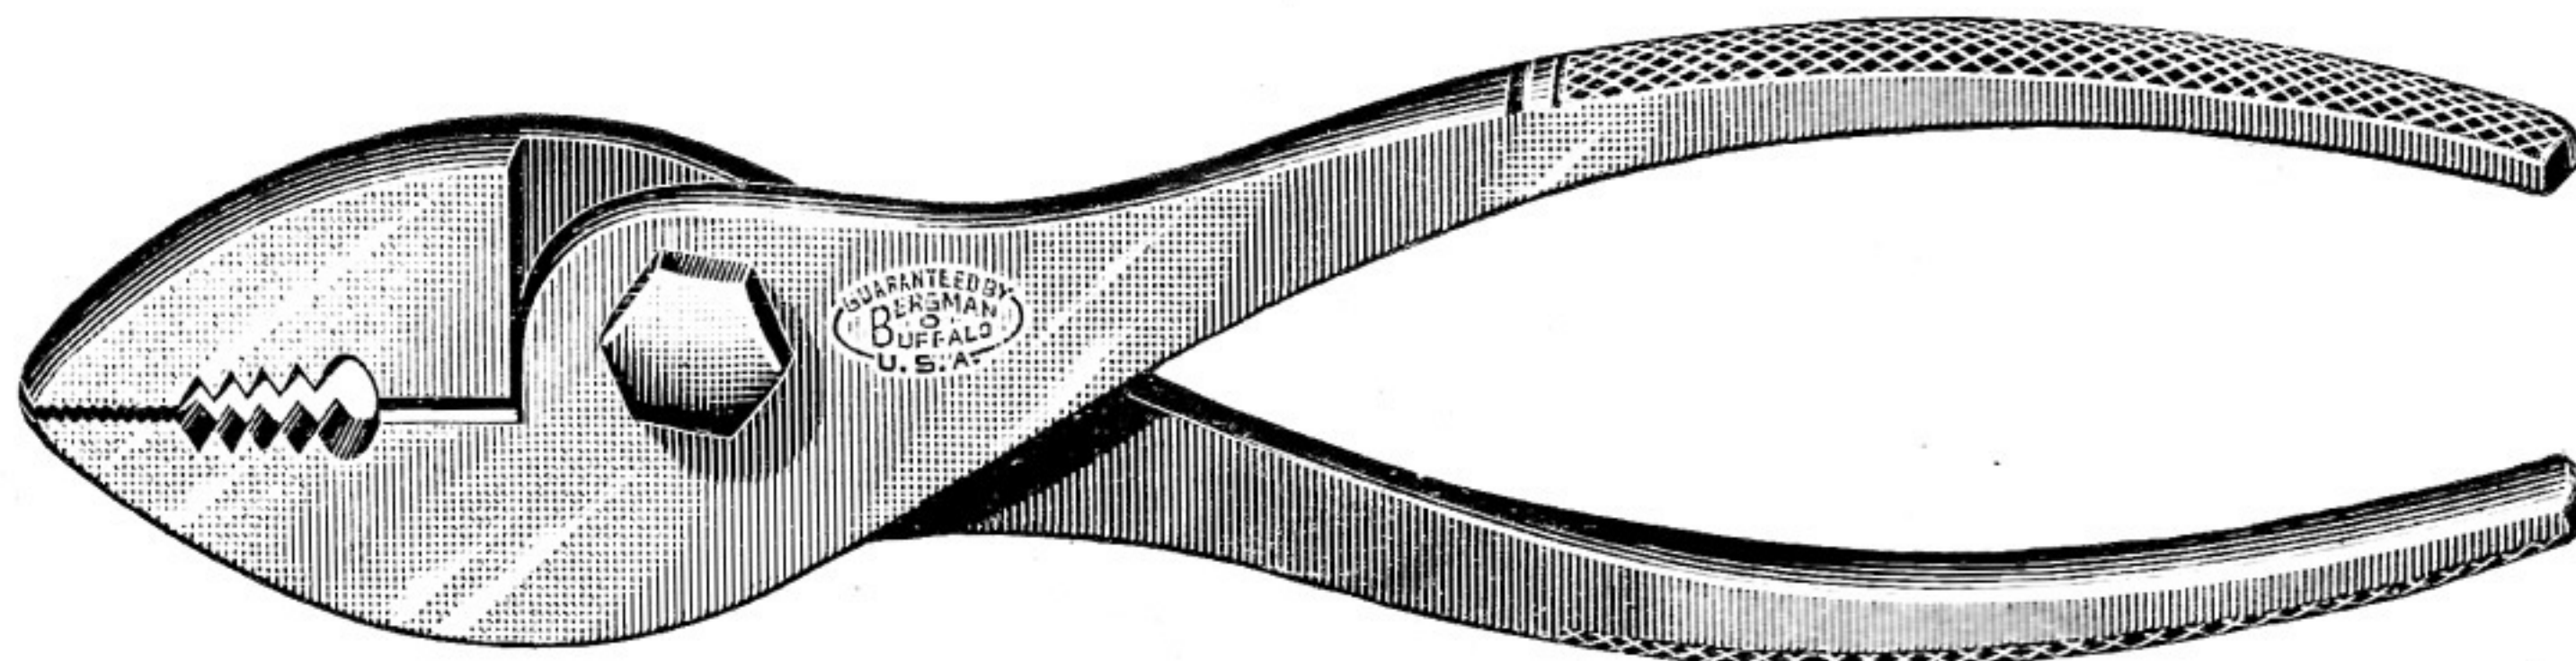

Extra strength in construction allows this greater power to be used to the full. Jaws are especially strong. Strain is distributed evenly over every part of the wrench.

Built for long life under hardest usage, these wrenches deserve good display, and prove rapid sellers. No mechanic will go back to the old style straight handled wrench after using one of our improved design.

The most useful tool in
home, garage or shop.

Bergman Combination Pliers Side Cutting—Knurled Handles

Slip Joint

Motorists, Electricians, Mechanics, Householders appreciate the all-around utility of this plier. Its balance is perfect and the quality is of the highest standard. Handles are knurled to give a secure grip.

Bergman side cutting pliers are forged from 60 carbon steel, thoroughly tempered. The hand ground cutting edges will not break down and will give a lifetime of service cutting plain or insulated wire, although they are not adapted to cutting tempered wire.

Nickel-plated on copper. Holes drilled before punching, not punched from the solid, thus relieving all tension and insuring free working. Bearing surfaces cup-ground to maintain perfect alignment at all times. Made in 7-inch size only. Highly hand finished.

No.	Length	Finish	Price Per Doz.
60	7 in.	Nickel	\$

Packed: One in a carton.

Six dozen in case.

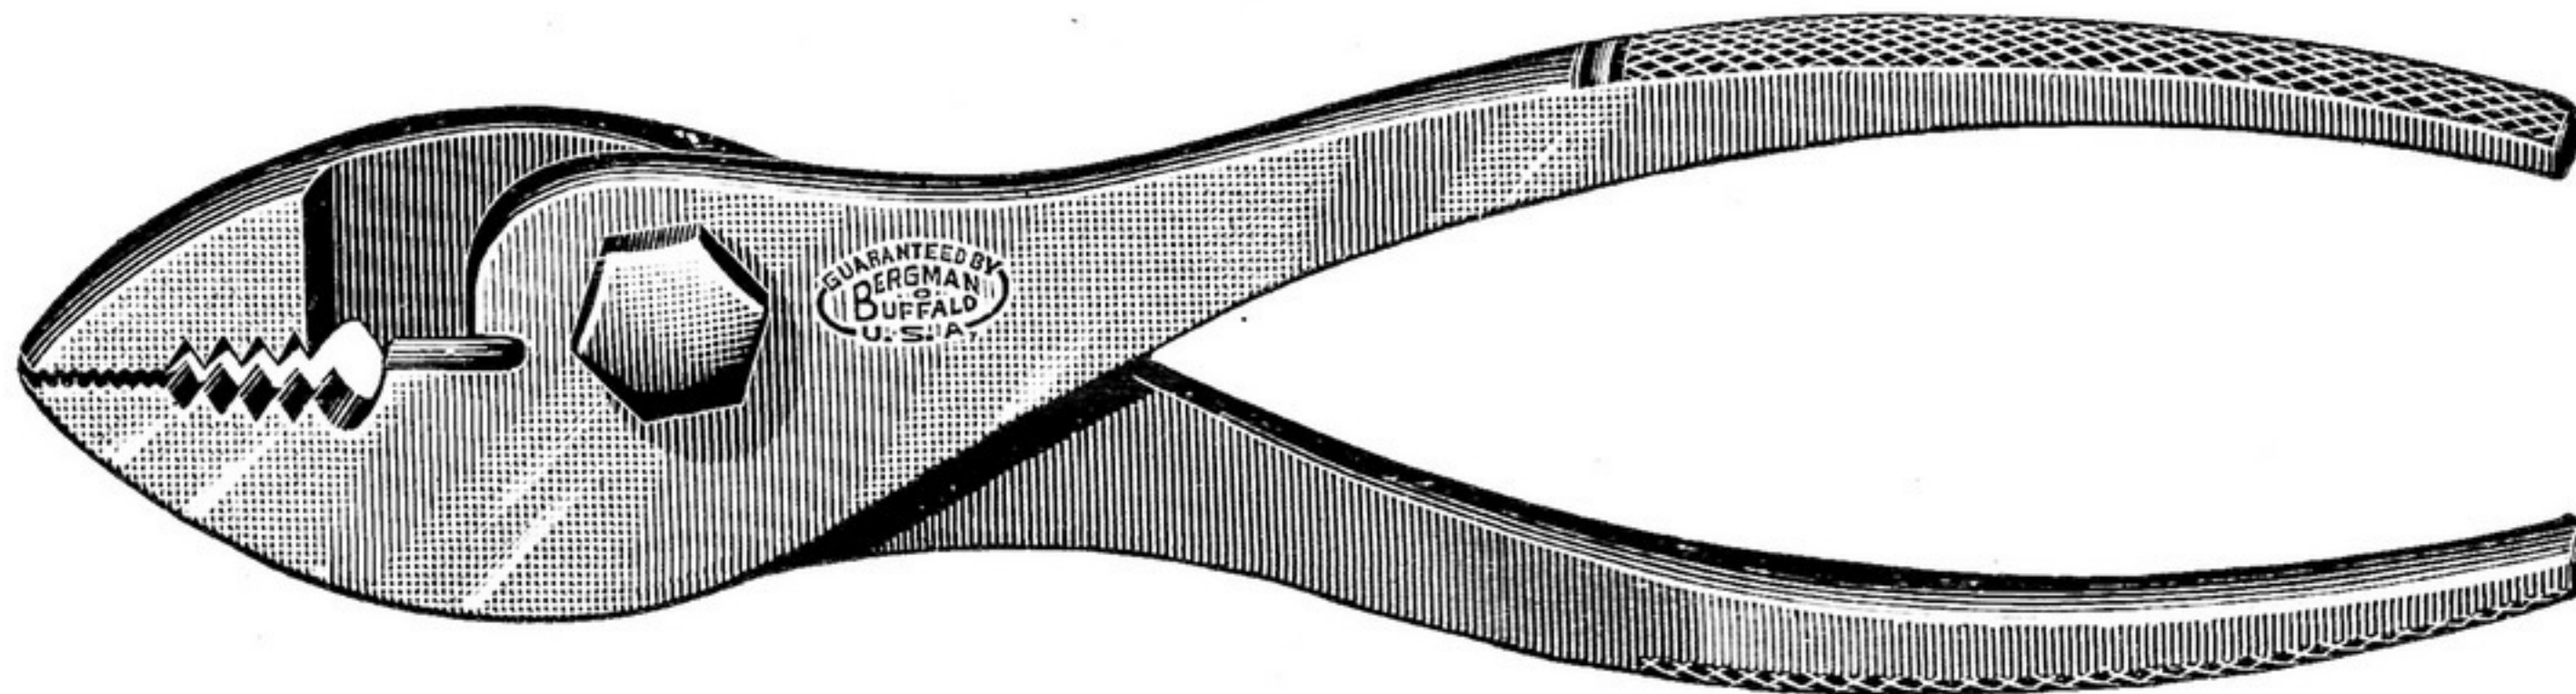

Weight per gross, 80 lbs.

THE BERGMAN TOOL MANUFACTURING CO.

Bergman Combination Pliers

Shear Cutting—Knurled Handles—Slip Joint

High Grade, High Power Tools,
Knurled Handles give perfect grip.

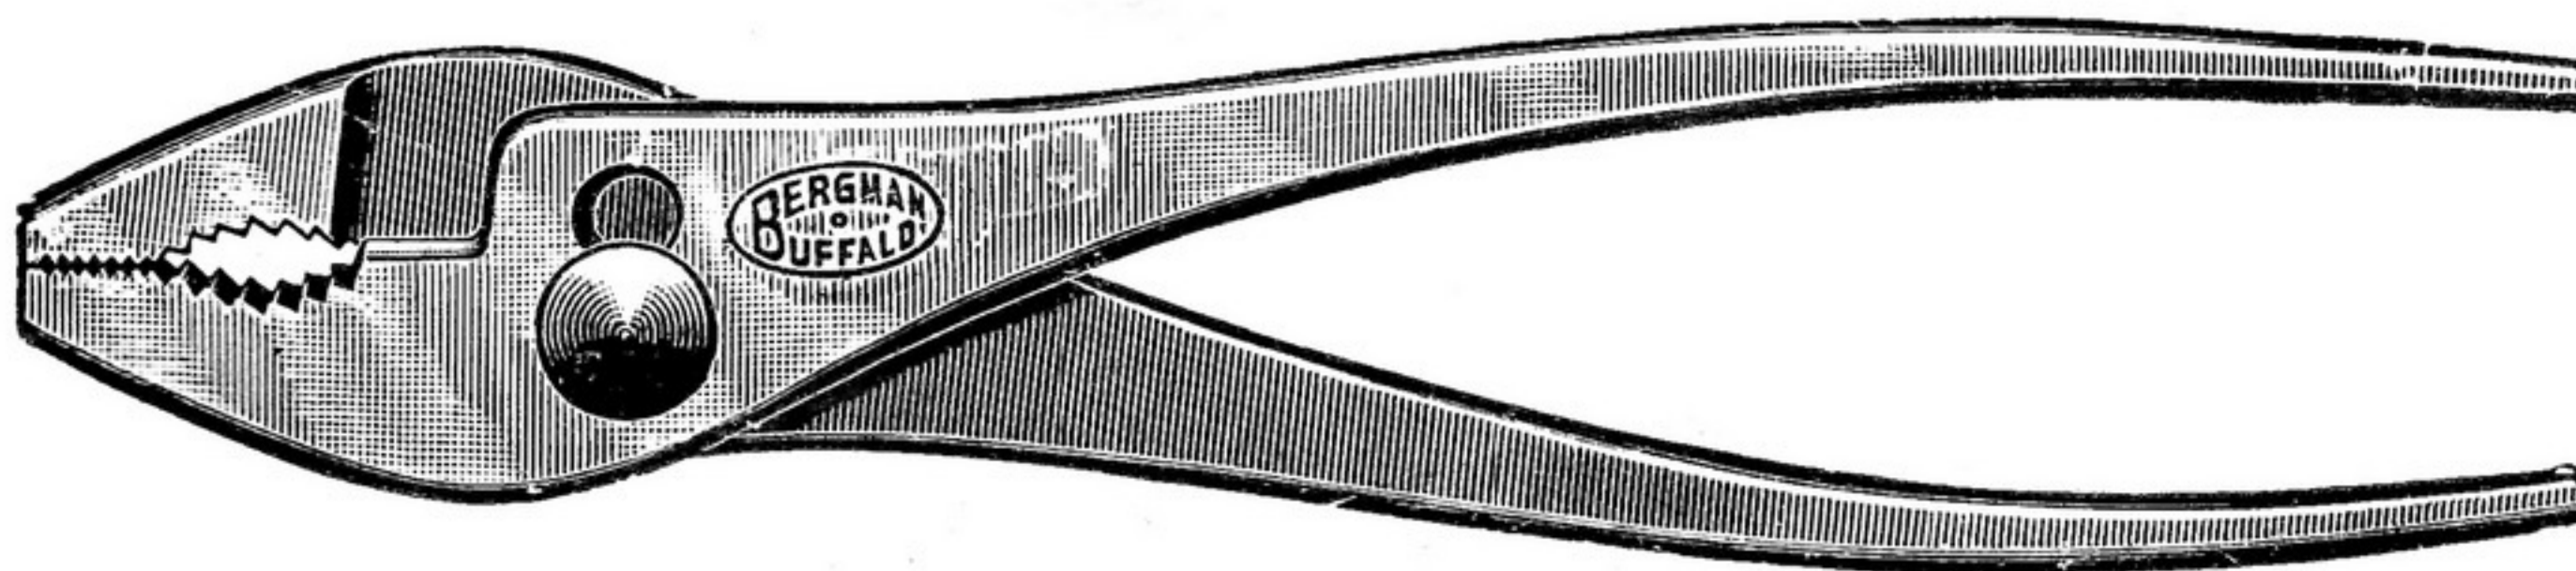

Thoroughly reliable gas pliers and wire cutter combined in one tool, and constructed to make the strongest and most effective pliers on the market. Nickel-plated on copper. Cut either plain or insulated wire equally well.

These pliers are drop forged from 60 carbon steel, and are perfectly tempered. The bolt holes are drilled, insuring free working; the bolts are tempered, insuring strength. Friction is eliminated and long life secured by having cup-ground bearing surfaces. There is an exclusive shear wire cutting slot. Handles of 6-in. size are knurled for perfect grip. Highly hand finished.

No.	Finish	Length	Price per Dozen
601	Nickel	6½-in.	\$

Packed: One in a carton.
Six dozen in case.
Weight per gross, 72 lbs.

Tapered Nose — Bull Dog Grip

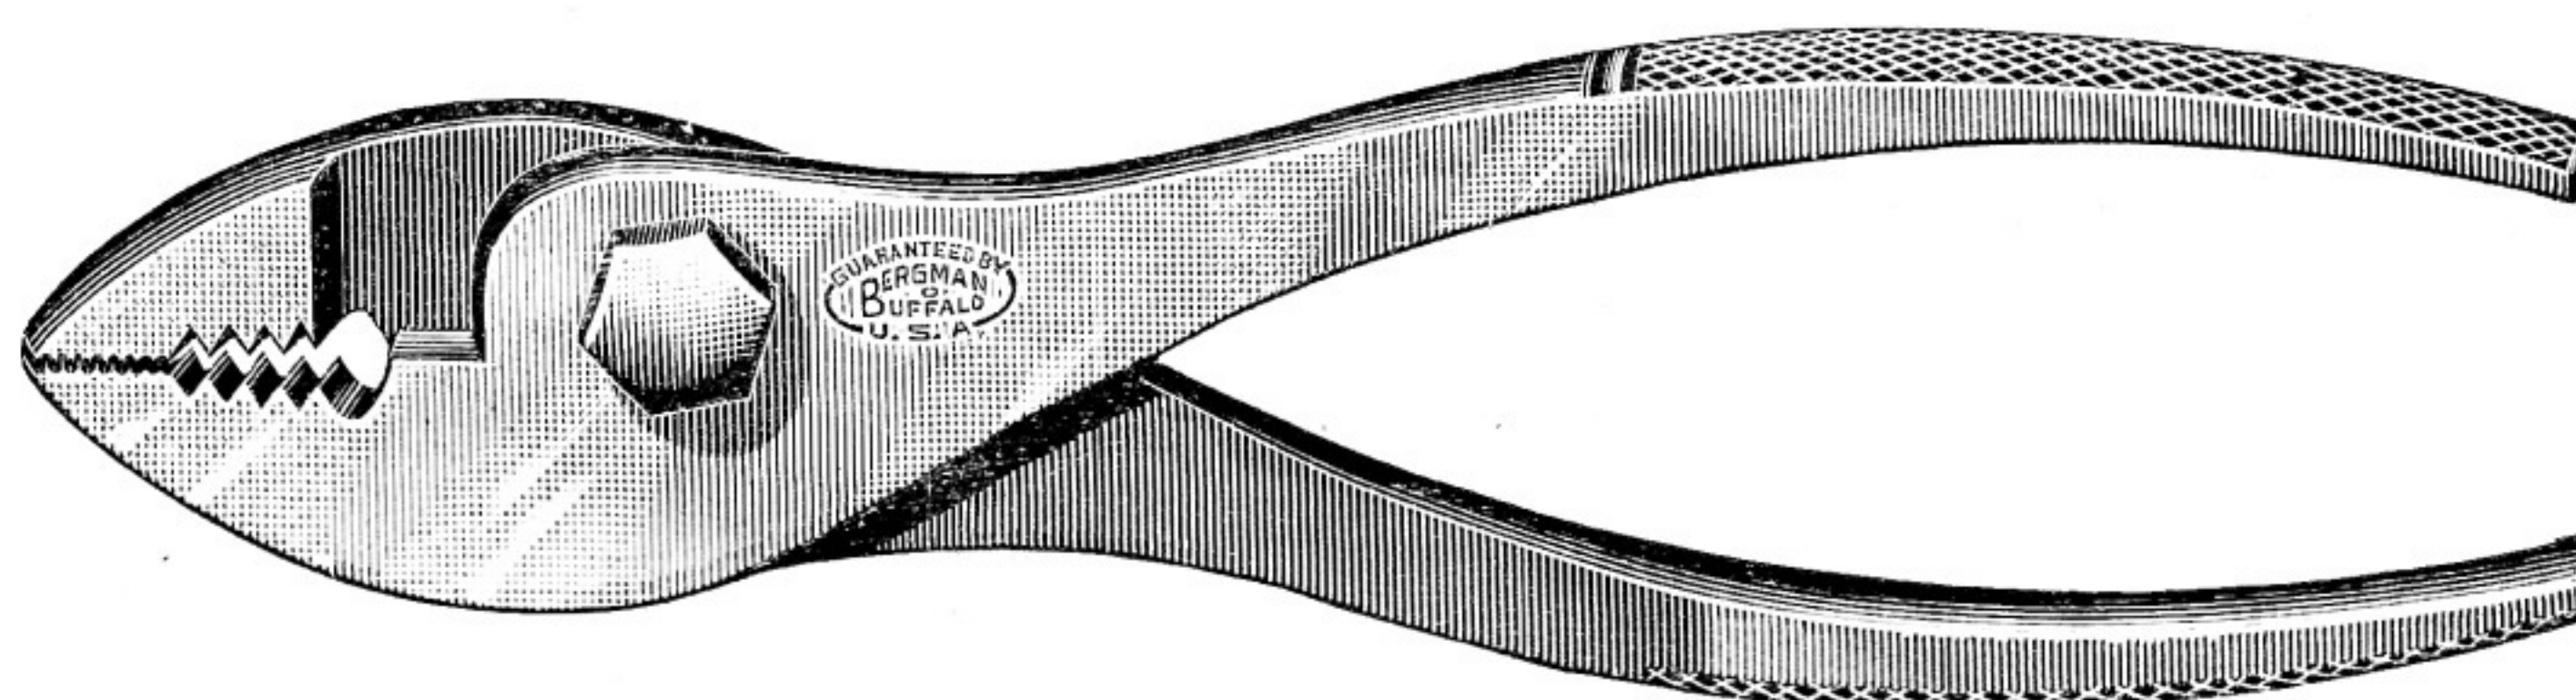

8-in. and 10-in. sizes have great strength and gripping power, and are especially efficient and popular because of their special nose design. Highly hand finished in all sizes.

THE BERGMAN TOOL MANUFACTURING CO.

Bergman Combination Pliers

White Nickeled or Satin Finish, Slip Joint, Knurled Handles.

A Profit Producer at Popular Prices.

Designed for the big demand for a popular priced, high grade combination plier. It is of the same construction as the pliers listed on the preceding page, except the finish which is white nickel. Drop forged from 50 carbon steel carefully tempered. To insure free working and relieve strain the bolt holes are drilled, not punched from the solid. Added strength is secured by using tempered bolts. Cup-ground bearing surfaces prevent friction, preserve alignment and lengthen life.

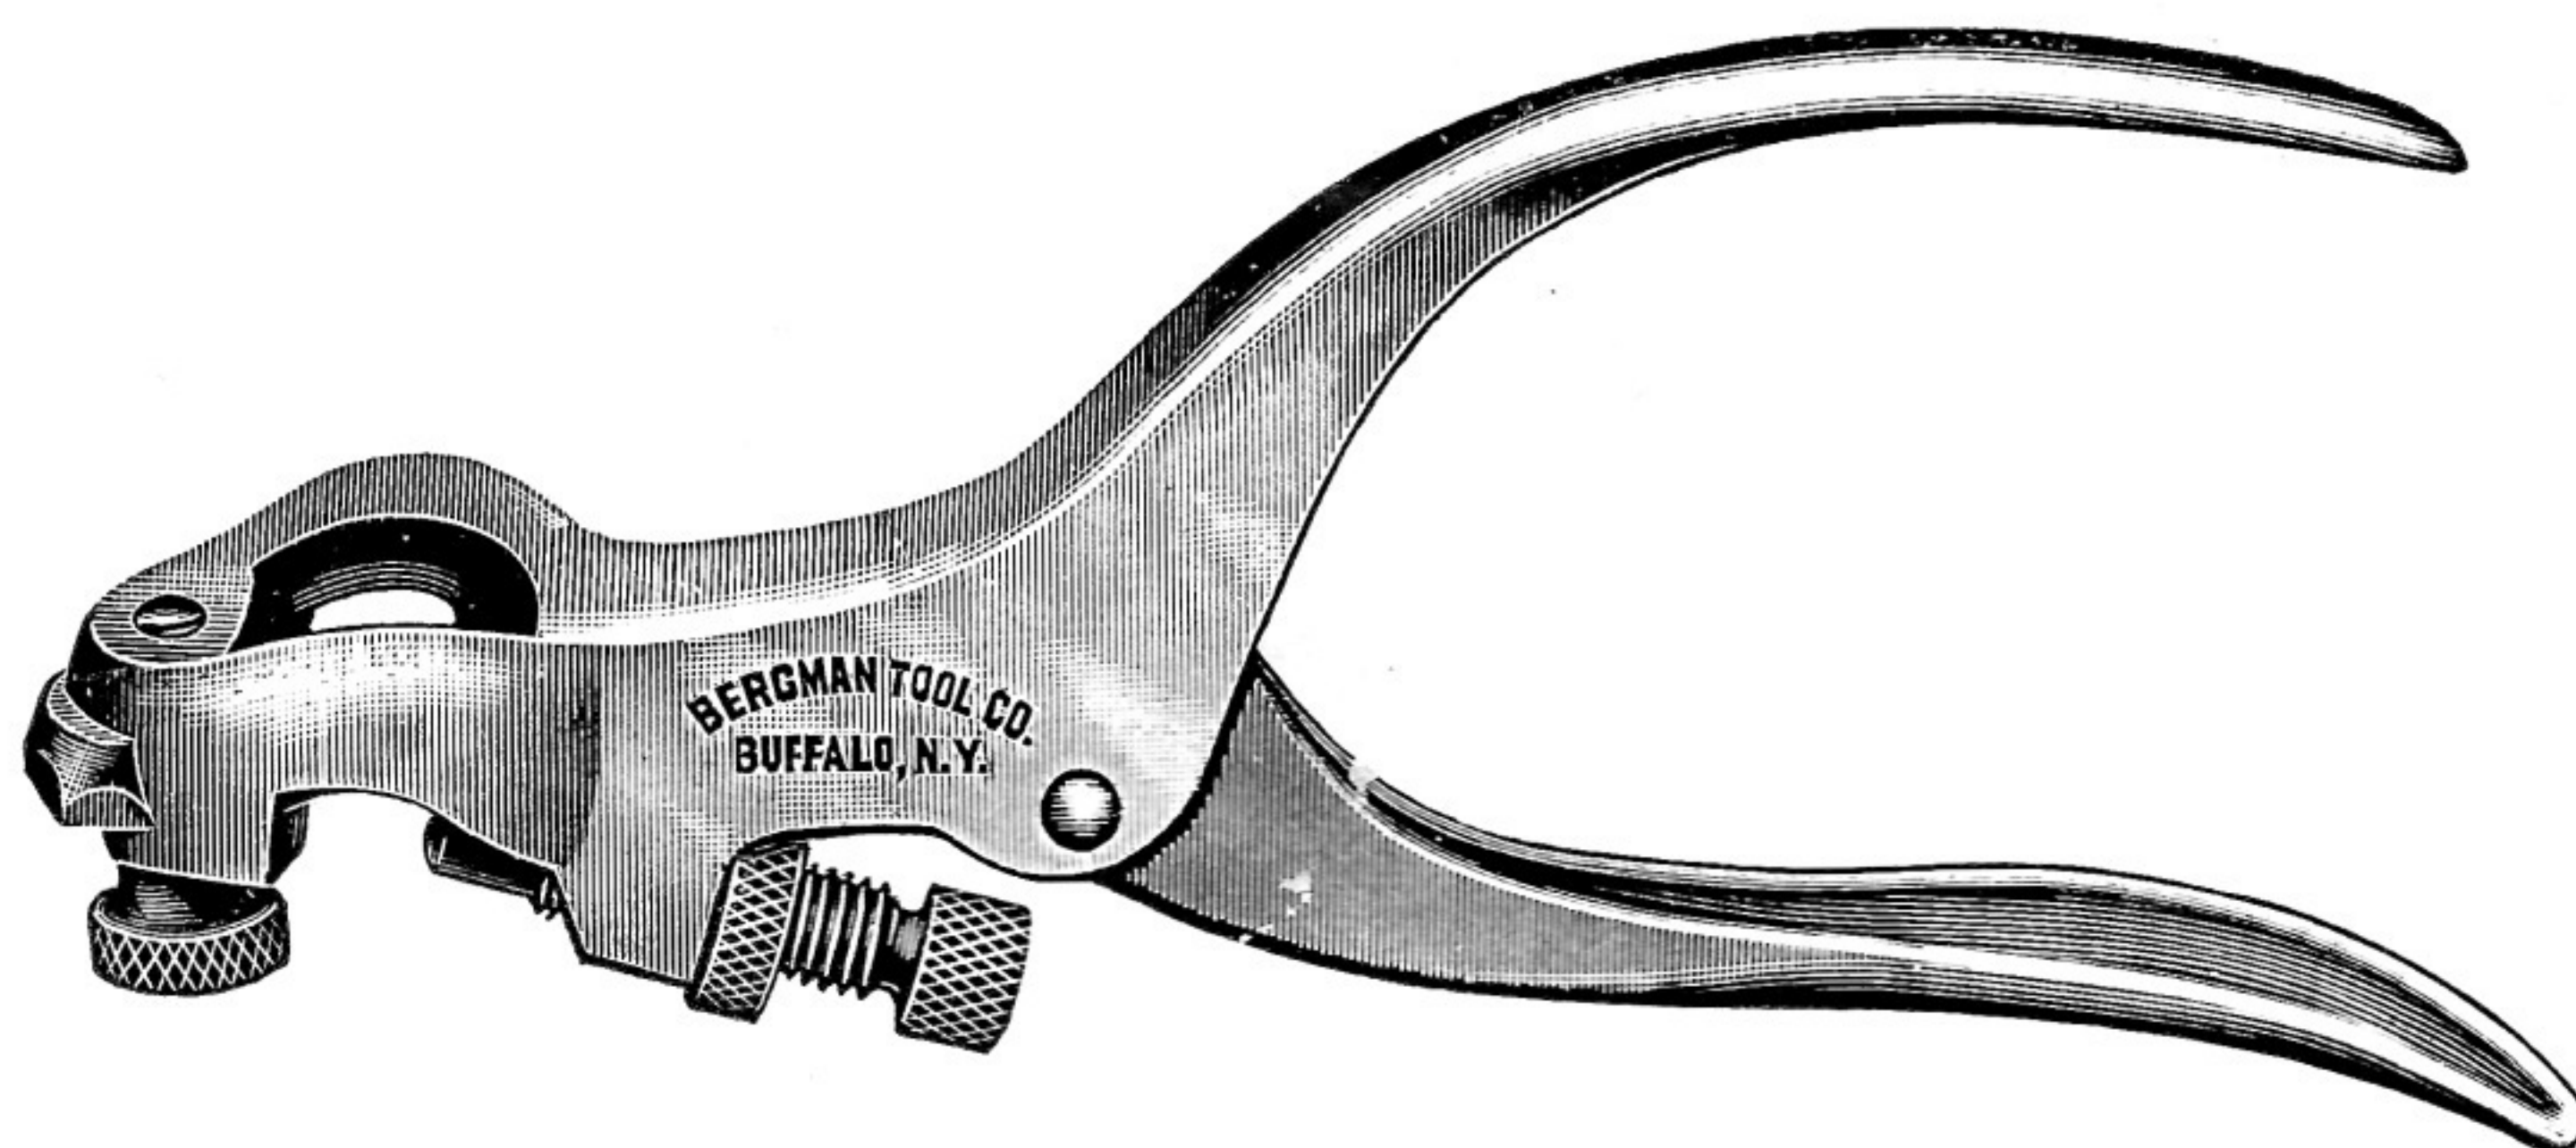

No.	Size	Finish	Weight per Gross	Price per Dozen
705	5½-in.	White Nickel	33 lbs.	\$
703	6½-in.	White Nickel	72 lbs.	\$

Packed: One in carton.

No. 705—12 Dozen in Case.

No. 703— 6 Dozen in Case.

Bergman Improved Reversed Lever Saw Set

Absolute Accuracy Assured.

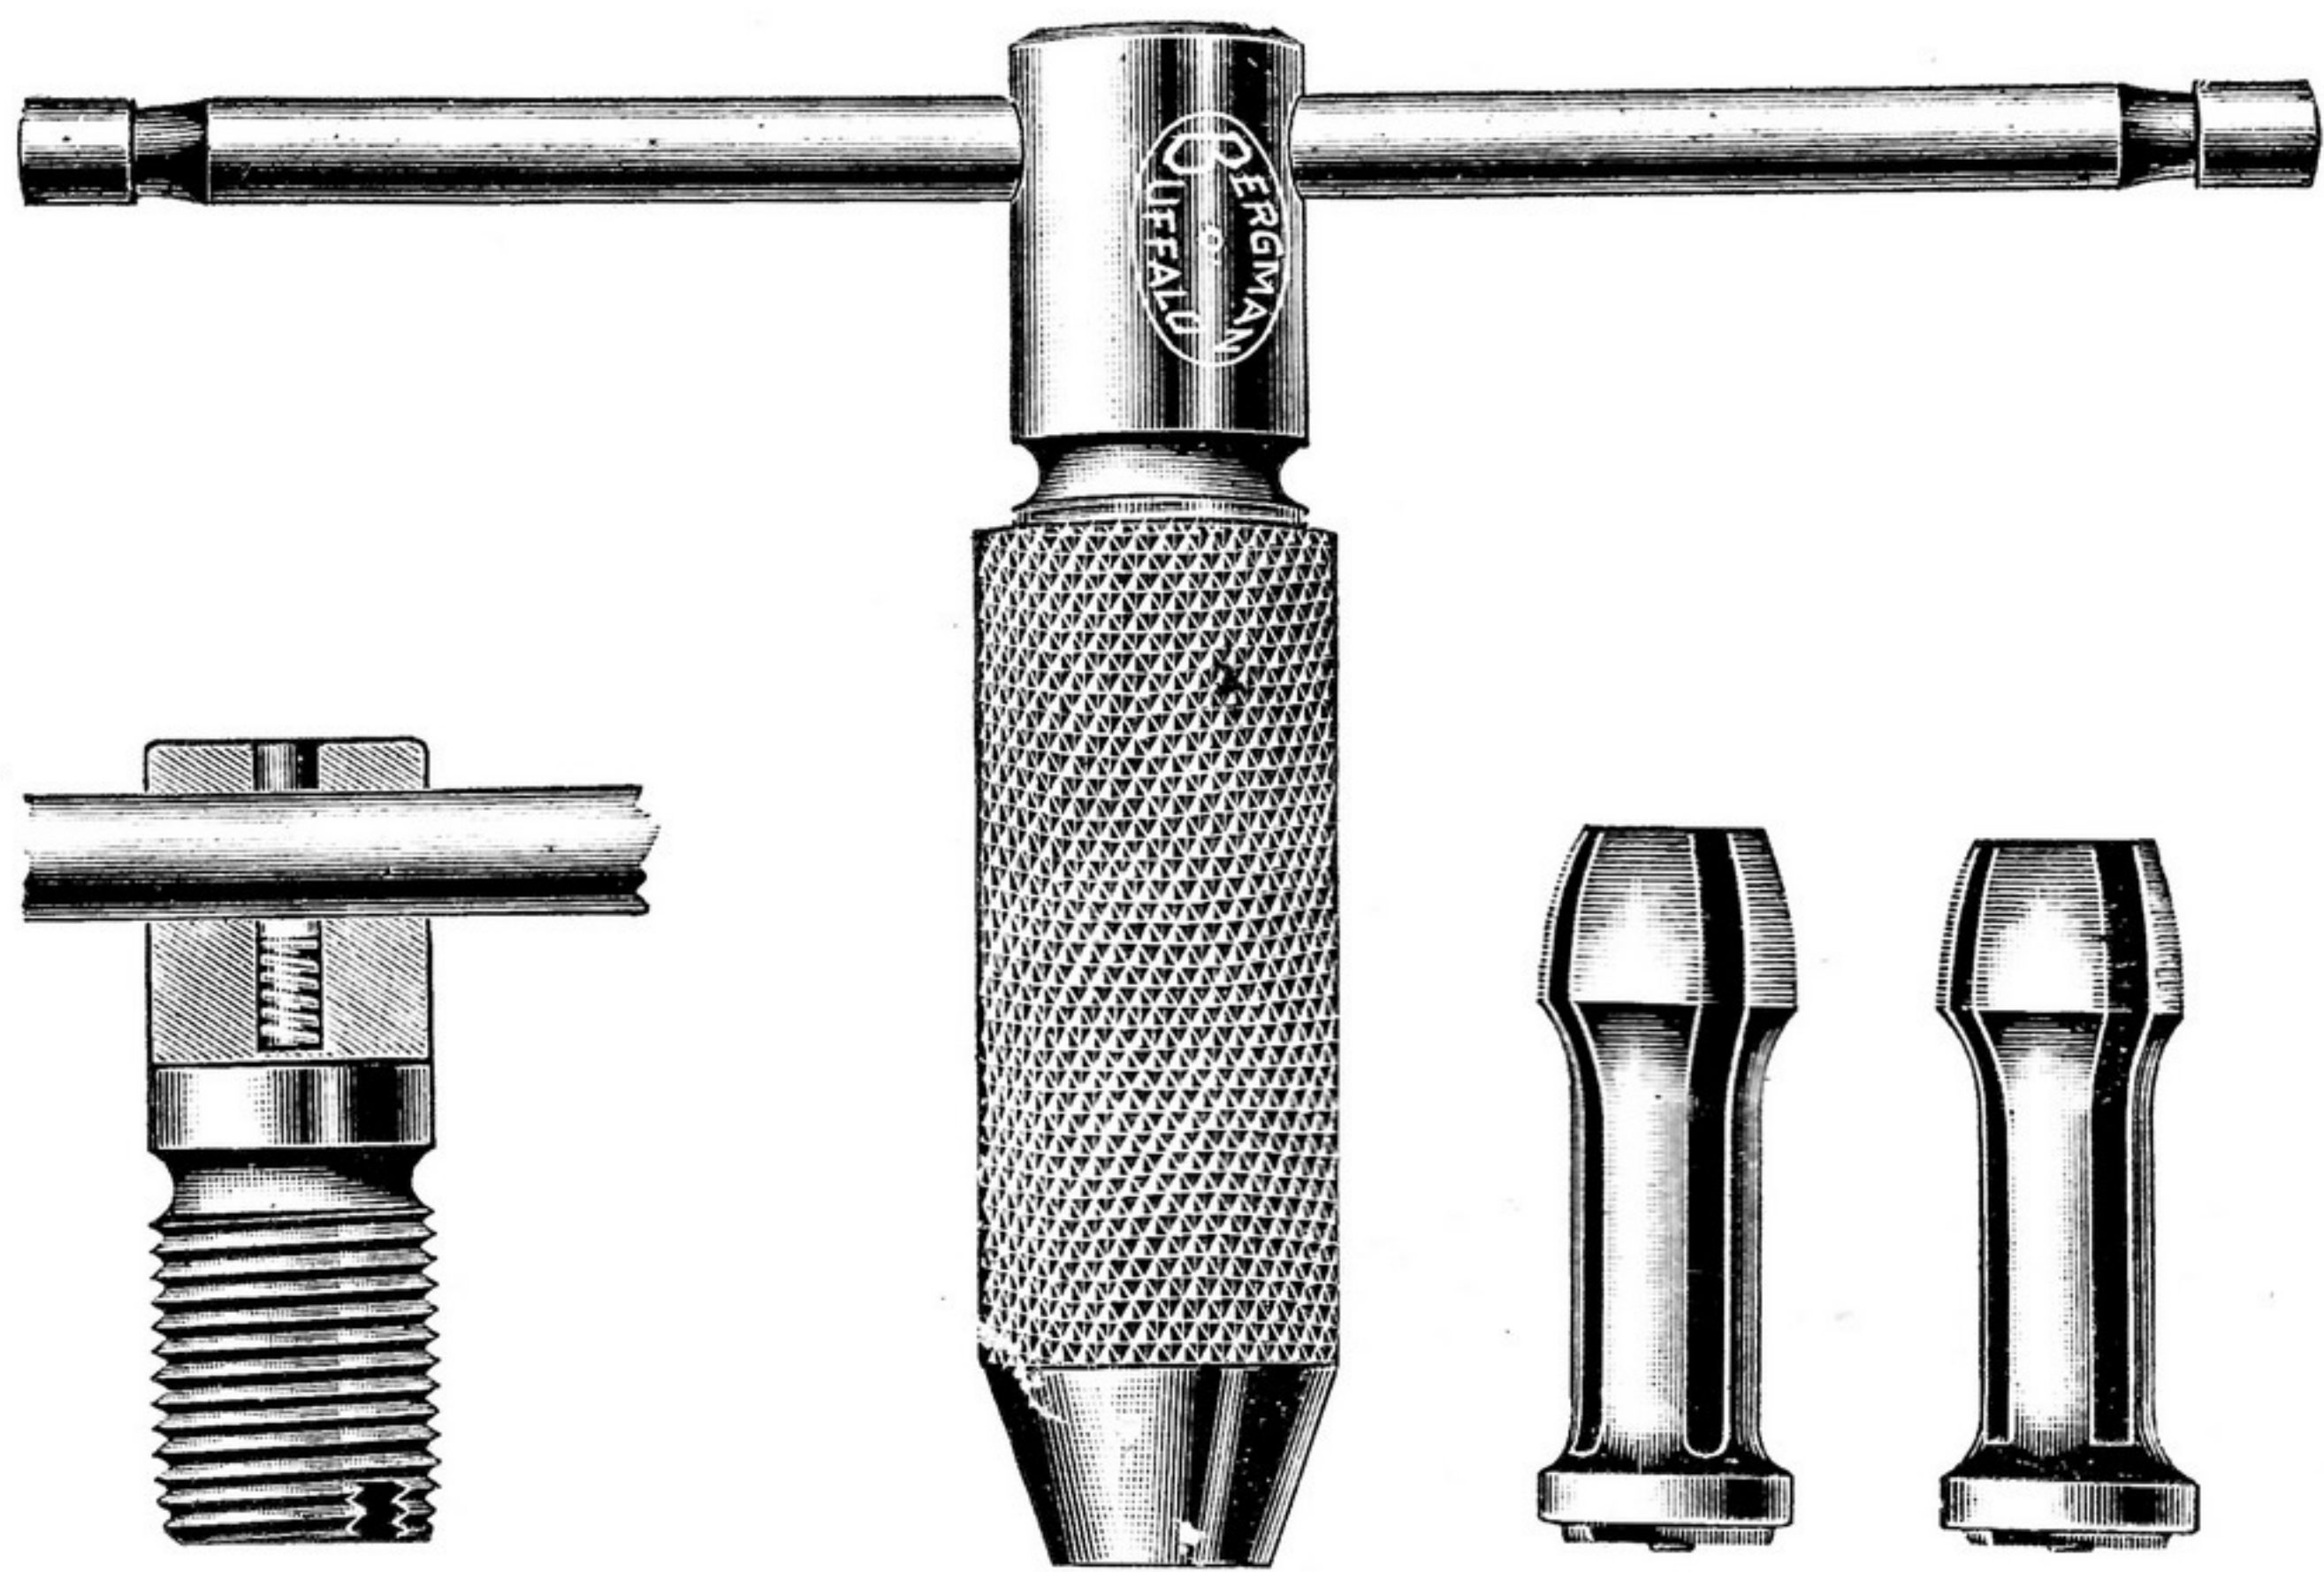

The Bergman Improved Reversed Lever Saw Set is the most accurate tool of this type now on the market. Because of its numerous exclusive features it finds a ready, profitable sale. It is constructed of malleable iron—not cast iron—and is therefore lighter and stronger.

It is made with revolving numbered dial, with dial lock to prevent slipping, and lock nut on adjusting screw to insure uniformity of set. It has a solid collar on tool steel plunger, which gives firm bearing for 6-coil piano wire spring. Nickel-plated on copper or Polished finish. Dial and plunger carefully heat treated.

No.	Finish	Weight per Gross	Price per Dozen
185	Nickel-Plated	96 lbs.	\$
186	Polished	96 lbs.	\$

Packed: One in a carton.

THE BERGMAN TOOL MANUFACTURING CO.

Bergman “2 in 1” Tap Wrench

Two Tools For The Price Of One.

Another Bergman specialty tool—is typically original in design and assures the dealer a quick, easy sale at a pleasing profit. Its “2 in 1” feature makes it particularly attractive.

It is constructed entirely from steel. The sliding handle is held in any desired position by means of spring tension on steel plunger. Barrel is case hardened and heavily knurled, assuring firm grip. Collets made from high carbon tempered spring steel. It can be used with taps or drills as desired and is centered for lathe use. In two sizes—Small and Jumbo.

Size	Holds Taps	Holds Drills	Price per Dozen
Small	$\frac{1}{16}''$ to $\frac{3}{8}''$	Up to $\frac{1}{4}''$	\$
Jumbo	$\frac{1}{4}''$ to $\frac{1}{2}''$	$\frac{1}{8}''$ to $\frac{3}{8}''$	\$

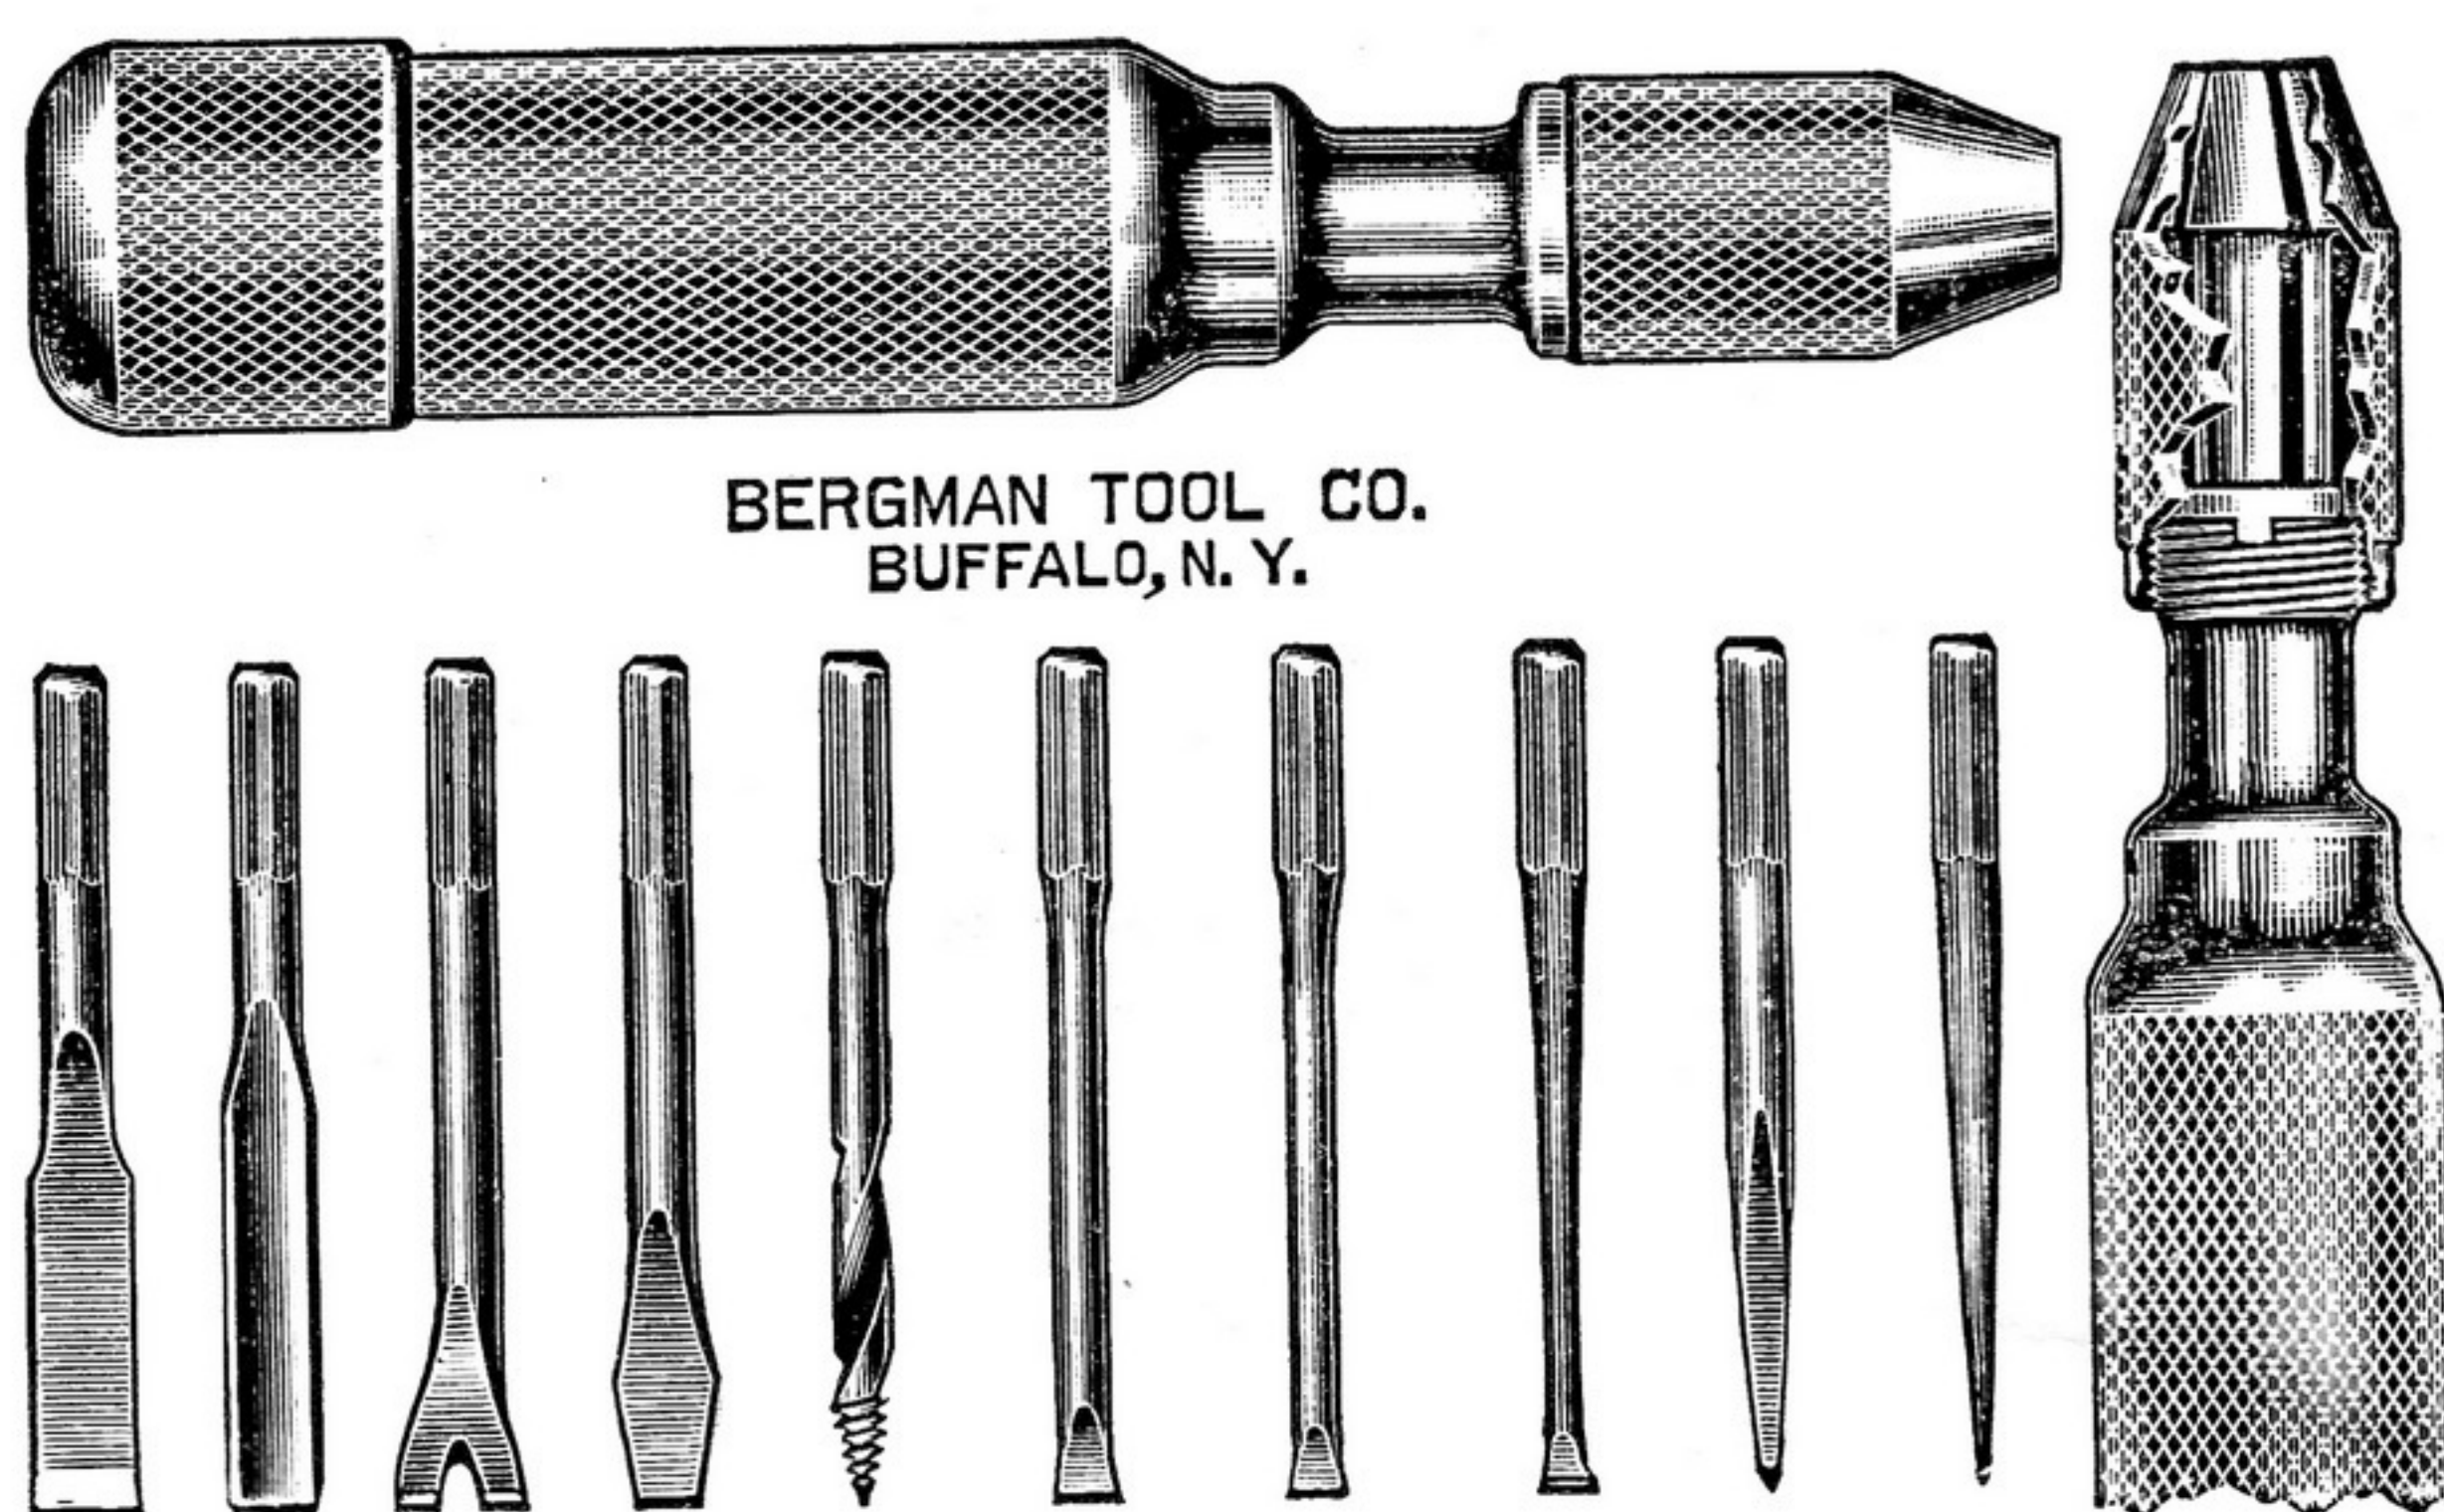

Packed: One in a carton.

Weight per gross: Small, 47 lbs.

Weight per gross: Jumbo, 96 lbs.

Bergman Improved Tool Handle

Sells on Sight.

The universal tool for universal use, containing ten high-grade tools carried in handle magazine, and of such attractive appearance that it sells on sight. It is the handy tool about the house and on the work bench—its market is unlimited.

Made from solid steel on automatic machines and positively indestructible. Has interchangeable spring steel collet; case hardened sleeve; barrel is heavily knurled to afford firm grip. Finish, heavily nickeled on copper.

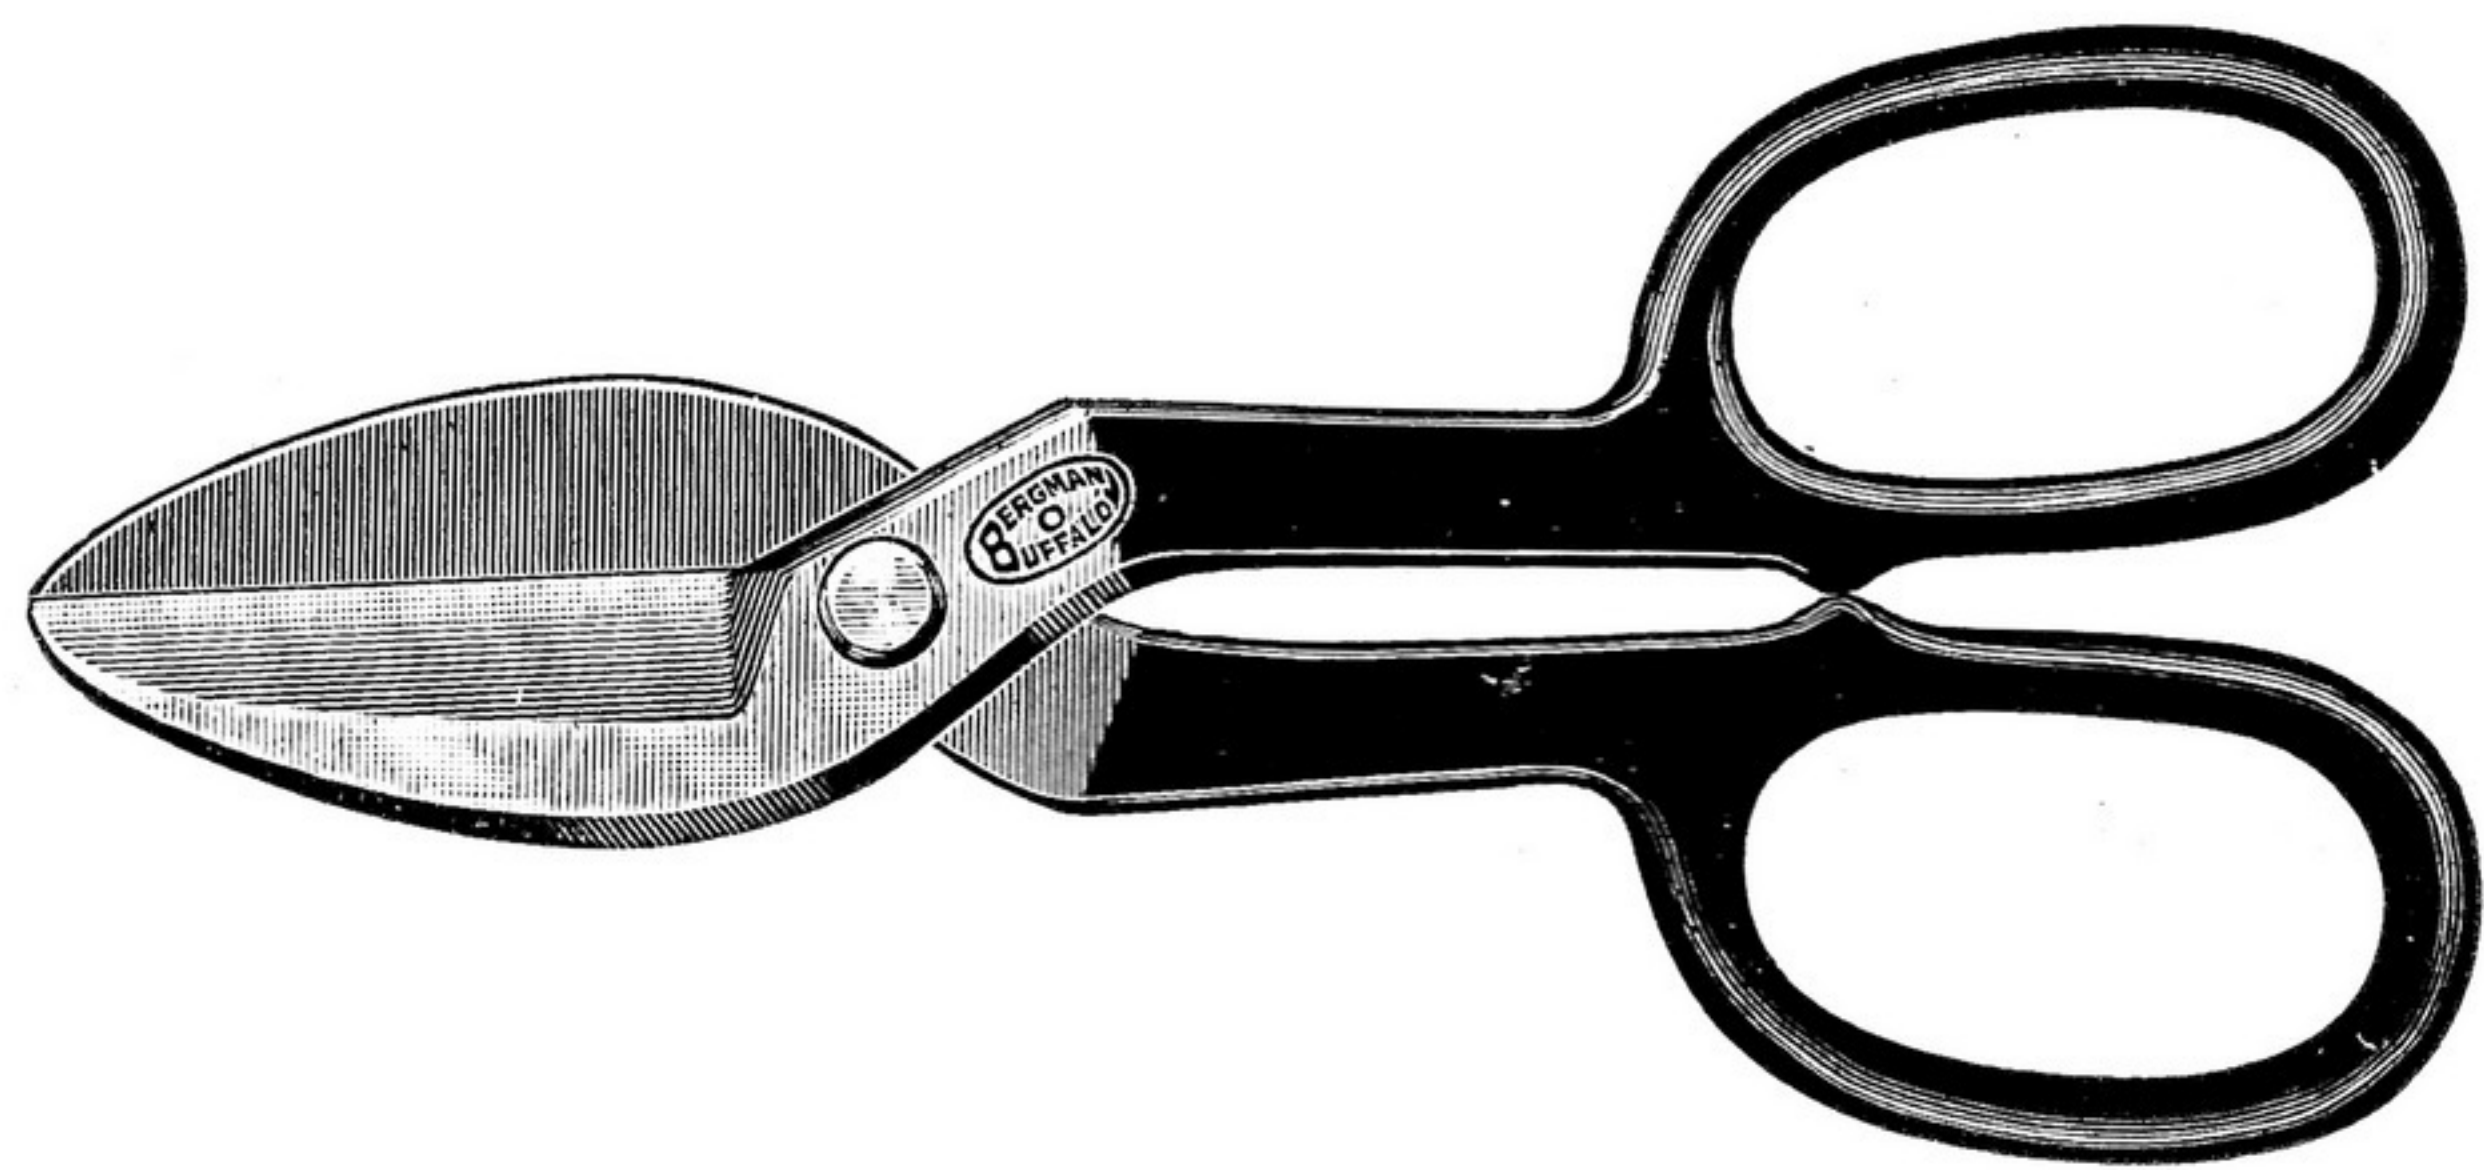

No.	Finish	Weight per Gross	Price per Dozen
10	Nickel-Plated	108 lbs.	\$

Packed: One in carton—All Parts Warranted.

THE BERGMAN TOOL MANUFACTURING CO.

**Bergman Guaranteed
Tinnners' Snips**

Machine Hollow Ground

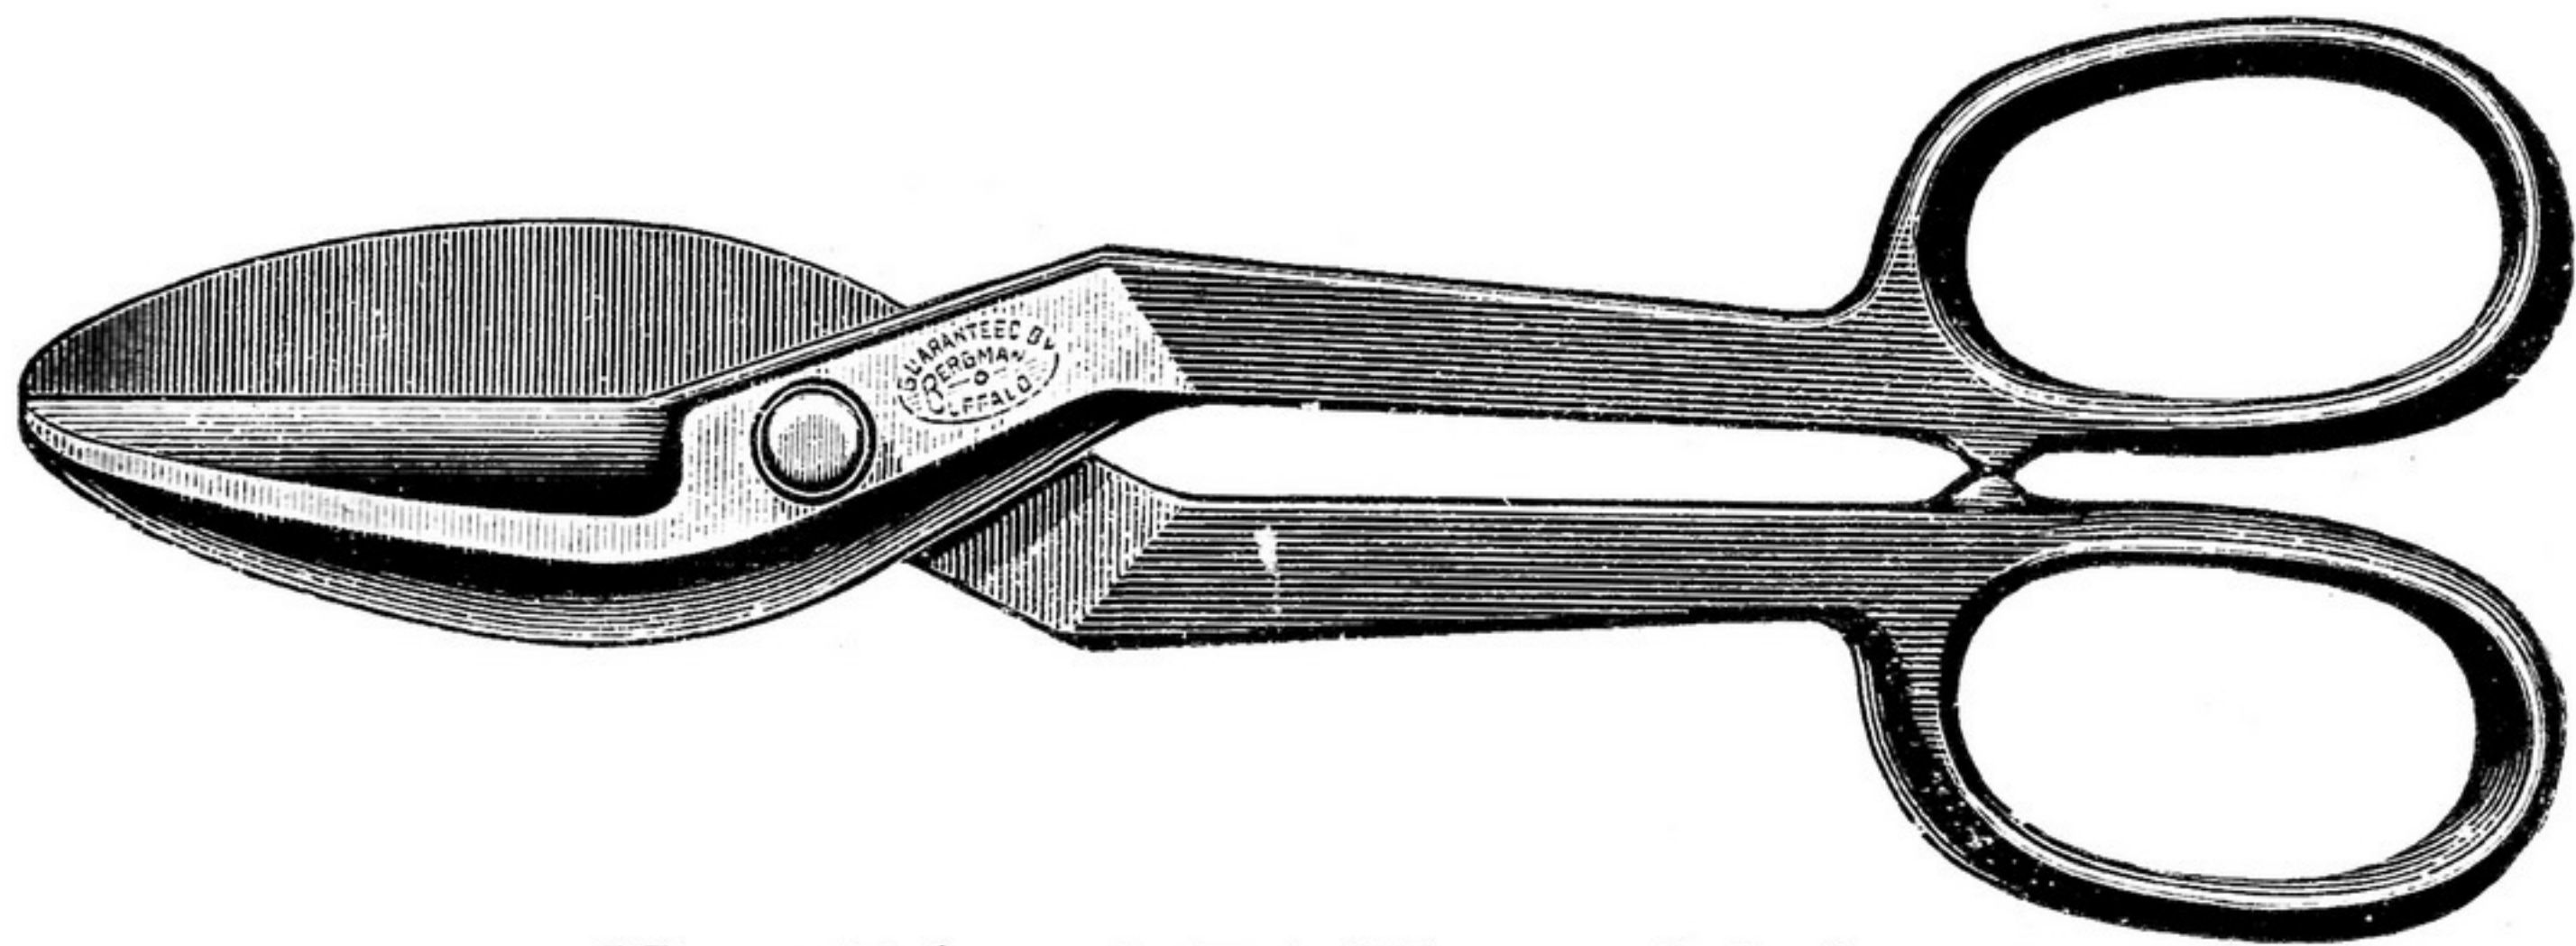

No. 2—Tinnners' Snips

Three practical sizes in Tinnners' Snips for mechanics and household use; made for real service. Cutting edges will not break down under hard usage.

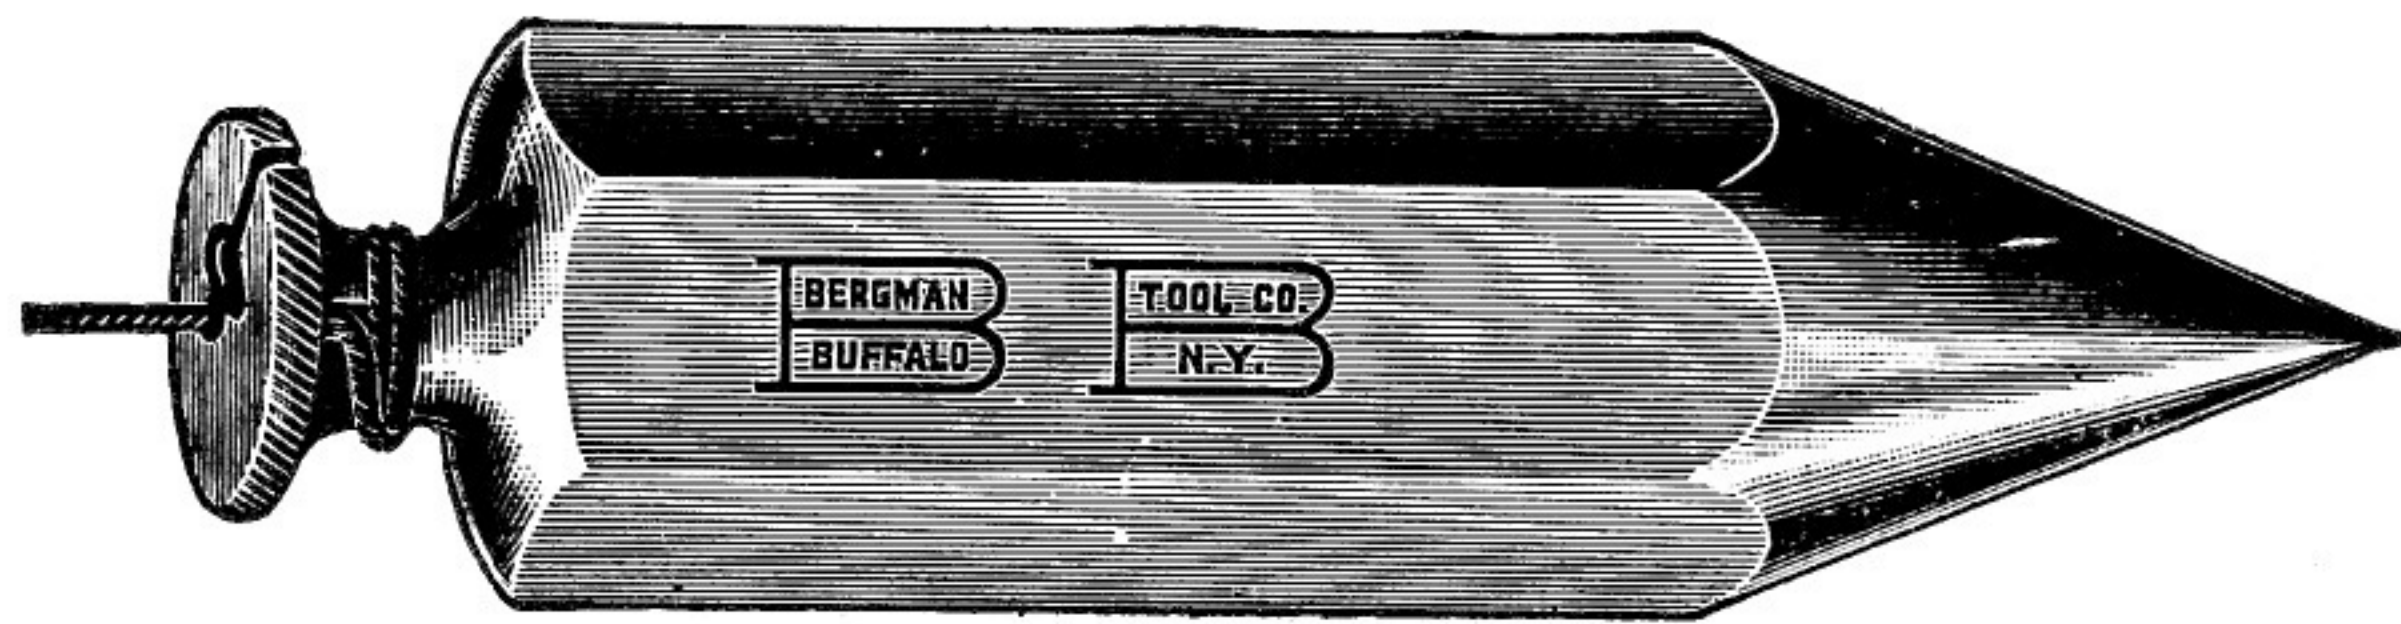

Solid drop-forged from 50 to 60 carbon steel, carefully tempered, machine hollow ground blades; baked Japan handles; highly polished blades.

No.		Cutting Edge	Total Length	Weight per Doz.	Price per Doz.
